## attention please!

Welcome to a place where you will immediately feel at home: Sedus attention. As a highly desirable workstation and focal point in the office, it impresses with its outstanding functionality, stunning design and high-quality appearance. Its lightness and customised solutions for the most diverse office areas ensure a sense of well-being and motivation. Eight hours on the job – and it doesn't stop there. Sedus attention.

Design: Andreas Struppler

# One system. Three versions. An infinite number of possibilities.

Work and feel good – the attention desk system offers the best prerequisites for this ideal combination. After all, with its three frame versions, a range of desktop designs and use-oriented

ergonomic options, attention is ideal for practically all applications in the office. Whether as an attractive single desk, in small groups or for meetings – attention is always up to the job.

**attention A**  
Stylish design for the toughest of demands.

**attention T**  
A harmonious combination of ergonomics and design.

**attention 4**

Design cast in one piece –  
stylish and timelessly beautiful.

## attention A: Concentrating on the essential has never been so elegant.

attention A makes a desirable workstation even more appealing. At first glance and with every hour you spend at it. The simple, elegant design radiates a sense of lightness and individuality.

Without losing sight of the job in hand. Sedus attention A is able to satisfy even the most demanding criteria as it gives users the very special feeling of always being in the right place.

The desktop shown is a bespoke item designed by the photographer.

**Impressive.** Die-cast aluminium feet highlight the desk's elegance and individuality. They are available in three colours, either polished or powder-coated.

attention A – an eye-catching workstation which, at the same time, also encourages productive working, whichever way you look at it. From the height-adjustable side elements through to the worktop which gives the impression of floating, whether with soft geometric lines or as a desk or conference table – attention A has got it covered. In every respect.

**Elegant solution.** For a tidier and clutter-free look, the legs feature an optional integrated cable guide.

**Appealing meeting point.** Not just a unique eye-catching workstation with a feel-good character, but also a place for smaller meetings: Sedus attention A.

## attention T: Design and ergonomics hand in hand.

We all have our own reasons for liking our individual workstations. attention T offers a few more pivotal arguments. In addition to the attractive and light design, it also boasts a whole series of features: The integrated manual height adjustment mechanism functions without

the need for tools. The alternative motorised height adjustment allows users to simply switch between standing and sitting – meaning you can change sitting position when working, or convene spontaneous meetings. Without wasting time shuffling around chairs.

**Extremely flexible.**  
attention T represents perfect ergonomics – regardless of whether you are sitting or standing. The optional return table is also available with a motor.

Sedus attention T is able to satisfy ever-growing demands and the need to be flexible in terms of both modern single and double workstations. The inner values such as the stable welded central cross-rail and the optional floating

motorised height adjustment are just as impressive as the many individual design versions and applications. And, what's more, the lightness of the beautifully harmonious design is conveyed to the working environment at every glance.

**Height adjustment without the need for tools.** Simple, quick and customised adjustment of the desk height with an adjustment range of 650 – 850 mm.

**Motorised height adjustment.** With integrated sensor-controlled cut-out: Simple adjustment at the touch of a button, for sitting and standing heights of between 650 mm and 1250 mm.

**Memory function.** Motorised height adjustment with digital display and memory function for four pre-selected heights is optionally available.

**Elegant look.** The gently curved panel provides an elegant finish and gives attention to its light appearance.

**Wide range of features.** The bases, side elements and panels are available in a range of materials and colours to create customised designs. The cables are integrated discreetly in the optional cable guides or, if necessary, following the height adjustment.

## For meetings at the highest level – sitting and standing.

attention T high conference provides an attractive meeting point in the office which can be used when seated or standing; perfect for discussing the company's strategic orientation, or simply for the weekly team meeting. With a width of up to 3600 mm, it offers enough space

to get everybody actively involved. And with the optional motorised height adjustment, it can be raised to a height of 1250 mm. For more focused attention, greater efficiency and enjoyable teamwork.

**Spontaneous change.**  
With attention T high conference, seated meetings can be changed to standing meetings and back again in a matter of seconds.

## attention 4: Stylish and timelessly beautiful.

In day-to-day life, there is often very little time left for the special things – yet these motivating extras are part and parcel of feeling good. For example, attention 4's tool-free ratchet height adjustment feature. Its stylish design and

timeless form are guaranteed to impress without taking over the whole room. The desktop which gives the impression of floating conveys a sense of lightness – even with variable linkage solutions and multiple workstations.

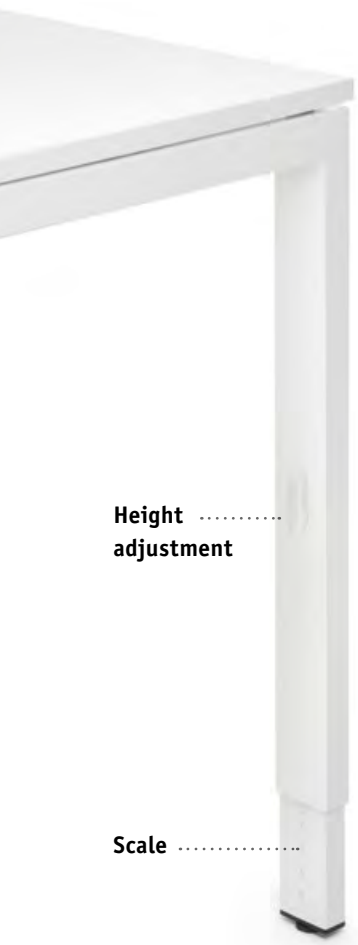

**A clear statement.**  
The harmonious design  
and lightness of  
attention merge to  
provide an attractive  
workstation.

Design and functionality, lightness and stability – with Sedus attention 4 everything works together, hand in hand. Which explains how it can perfectly satisfy the needs of both single and multiple workstations. From the invisibly welded frame structure comprising harmonious rectangular tubes, and height adjustment at the touch of a button, through to the cable guide, cable dump and modesty panel – all the features merge to create a beautifully stylish overall impression.

**Cast in one piece.**

The slim legs with a rectangular cross-section follow on in the design of the desktop and include an understated integrated ratchet height adjustment feature which can be operated without tools. The scale on the leg makes it easier to set a uniform height for all legs.

**Practical.** The cable guide renders the cable practically invisible and is aesthetically pleasing.

**Floating desktop.** The gap between the side element and desktop underlines the sense of lightness. The rectangular profiles which have been welded on a mitre also further enhance the impression of elegance.

# The ideal desk? One which meets your needs perfectly!

One desk system – an infinite number of possible configurations. Sedus attention is an attractive range which can be used for the most diverse requirements and applications. From the three frame versions and the new desk shapes which can be individually selected, through to the extremely practical and ergonomic details. With attention you get just the workstation you need to do your job. An uncompromising solution combined with the first-class and long-lasting quality with which Sedus is synonymous.

## Double cross-rail.

The cross-rails have been designed to harmonise perfectly with the frame versions and provide variable options for attaching extensions and accessories.

## Frame versions.

With three shapes in a range of colours and finishes which can be individually selected, attention leaves nothing to be desired.

**Desktops.** The wide range offers the ideal prerequisites for creating your own unique workstation. You will find all the shapes and sizes on page 22.

**Device mounts.** If necessary, all workstations can be fitted with a mount for devices such as a printer, laptop or PC.

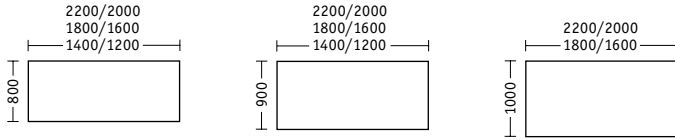

**Lockable drawer.** Personal items such as a tablet PC and mobile phone can be stored away from others here, but are nevertheless close at hand.

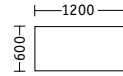

**Function bridge.** Thanks to the special function bridge adapter, attention can be flexibly adapted to changing needs. To keep things organised, the third level can be fitted with a number of practical elements.

# Diverse, practical, stylish.

attention is guaranteed to wow – from the very first glance right down to the smallest detail. Regardless of whether for single or multiple workstations and which requirements are to be satisfied, attention is always able to offer just

the right solution. With a comprehensive range of practical and intelligent accessories which make day-to-day work that bit easier and more pleasant. Without losing sight of its intrinsic style.

## Less is more.

The recessed leg in the linear linking system ensures greater freedom of movement.

**Opaque.** The screen made of opaque fabric blends perfectly into the overall look and ensures privacy.

**Ready to hand.** The lockable drawer is discreetly positioned and provides a safe place for all your equipment.

**Interfaces.** With the help of spacers, attention T can be set up and fixed into place either on its sides or ends.

**Practical.** Optionally available sliding tops provide quick and direct access to the cable dump below. The locking mechanism guarantees secure closure and prevents accidental movement of the desktop.

# Sustainable through and through.

Sustainability and quality “Made in Germany” have been basic corporate principles at Sedus for more than 50 years. These principles are embodied in Sedus attention and reflected in the way we work: designing products which are recyclable, using ecologically tested materials, conserving resources, being energy-aware in our manufacturing and conducting ongoing quality tests.

For example, when producing the veneered attention desktops only selected woods such as beech, ash and oak from sustainably managed forests are used. State-of-the-art, energy saving and environmentally friendly production of the steel and aluminium components is also part of the quality and sustainability philosophy at Sedus.

Further information is available at [www.sedus.com/se/en/philosophy/ecology](http://www.sedus.com/se/en/philosophy/ecology)

**Innovative laser edging.** Seamless edge processing of the highest quality creates a durable, attractive and environmentally friendly end product.

**Native real wood veneers.** A fascinatingly beautiful and environmentally friendly base material from sustainably managed forests.

**Powder coating instead of paint finish.** We employ the more eco-friendly and higher quality powder coating for finishing and protecting against rust.

## Company:

Around the world, Sedus adheres to the principles of the UN Global Compact for human rights, labour standards, the environment and anti-corruption.
